PROFILE

Computer Science student specializing in Cybersecurity with 3+ years of freelance full-stack development experience. Builds practical web applications and APIs with a strong focus on security, performance, and problem solving. President of Ingeniums Club for 2025/26, leading technical teams and organizing major technical events. Experienced across full-stack development, networking, cybersecurity, and AI-powered applications.

EDUCATION

École Supérieure en Informatique (ESI-SBA) | Sidi Bel Abbès, Algeria **Sep 2022 – Expected 2027**

Computer Science — Cybersecurity / 3CS

- Relevant areas: Software Engineering, Computer Networks, Cybersecurity, Data Structures & Algorithms, Cryptography, Databases, Operating Systems, Web Development, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, HTML, CSS, R

Tools and Frameworks: React, Next.js, SvelteKit, Django, Django REST Framework, Node.js, Express.js, Git, Linux, Docker, kubernetes

Databases: PostgreSQL, MySQL, SQLite, GraphQL

Cybersecurity & Networking: Nmap, Burp Suite, Ghidra, GNS3, Cisco Packet Tracer, Web Security, Network Security, CTFs, Hack The Box

AI & Data: ML, DL, RAG, NLP, OCR, AI-powered application development

RELEVANT EXPERIENCE

Freelance Full-Stack Developer | Remote

June 2023 - Present

Software Development Engineer

- Built and delivered real-world web applications for clients, translating requirements and ideas into responsive, maintainable full-stack products.
- Developed frontend interfaces, REST APIs, authentication systems, database models, and deployment workflows using React, Next.js, Django, Django REST Framework, PostgreSQL, Docker, and Linux.
- Managed projects independently from requirements and architecture through implementation, debugging, iteration, and delivery, strengthening client communication and ownership.

Algérie Télécom | Batna, Algeria

Sep 2025 - Oct 2025

Networking & Innovation Intern

- Explored Algérie Télécom's network infrastructure and innovation initiatives, studying the evolution from DSL to modern FTTx technologies and gaining a practical understanding of broadband and fiber-optic networks.

PROJECTS

E-RCP Algérie | Full-Stack Developer · 2026

- A medical collaboration platform built around RCP (multidisciplinary case review) meetings, enabling doctors to create structured patient medical cases through customized forms, organize case discussions, and conduct remote meetings through integrated video calls.
- Developed** customized dynamic forms for collecting and structuring patient medical data, alongside case management and RCP meeting workflows.
- Implemented** integrated video conferencing and collaborative features to allow doctors to remotely review and discuss patient cases.

- **Technologies:** React, Tailwind CSS, Electron, Django, Django REST Framework, Django Channels, WebRTC, PostgreSQL, Redis, Docker, JWT

Lightweight ML-Based NIDS | *ML Engineer & Full-Stack Developer* • 2026

- A lightweight machine-learning Network Intrusion Detection System designed to detect and classify malicious network traffic efficiently, combining network analysis, ML models, and an interactive security dashboard.
- Built a network traffic analysis pipeline combining **Zeek** for network monitoring with **LightGBM** and **CatBoost** for intrusion detection and traffic classification, with **SHAP** used to explain model predictions and identify the features driving each detection.
- **Technologies:** Python, Zeek, LightGBM, CatBoost, SHAP, Machine Learning, Network Security

Mu7ami | *Full-Stack & AI Developer* • 2025

- A full-stack freelance marketplace engineered around a two-sided architecture, connecting clients with freelancers through service listings, gig discovery, real-time communication, and integrated payments.
- **Technologies:** Python, Django, React Native, RAG, NLP, OCR

Freely | *Web Front-end Developer* • 2023

- A full-stack freelance marketplace engineered around a two-sided architecture, connecting clients with freelancers through service listings, gig discovery, real-time communication, and integrated payments.
- Developed a two-sided marketplace architecture with gig creation, service discovery, ordering, client-freelancer messaging, and integrated in-app payment management.
- **Technologies:** SvelteKit, Tailwind CSS, Flowbite, Socket.IO

LEADERSHIP EXPERIENCE

Ingeniums Club | ESI-SBA

Aug 2025 - Aug 2026

President

- Lead the club's technical and organizational activities, coordinating teams, mentoring members, and driving technical events and community initiatives.
- Organized and coordinated Kodikos Hackathon, IngeHack CTF, and Ingeneer, a multidisciplinary challenge combining CTF, problem solving, design, AI, and networking.
- Represented Ingeniums at ECSEL Expo, a major Algerian e-commerce and technology event, engaging with professionals, organizations, and the wider technology community.

Ingeniums Club | ESI-SBA

Sep 2024 - Aug 2025

External Relations Vice Leader

- Contributed to building and maintaining partnerships with external organizations, sponsors, and student communities.
- Assisted in organizing events and managing communication with partners, participants, and external stakeholders.

Alphabit Club | ESI-SBA

Sep 2023 - Sep 2024

Finance Vice Leader

- Assisted in managing the club's finances, including budgeting, expense tracking, and financial planning for activities.
- Coordinated with teams to monitor event-related expenses and ensure efficient use of club resources.

Finance Member

- Supported the finance team in tracking expenses, preparing budgets, and managing financial records.
- Contributed to the financial planning and organization of club activities and events.

ACHIEVEMENTS

- Solved 250+ LeetCode problems, including Medium and Hard challenges, building a strong foundation in data structures, algorithms, and computational problem solving.
- Won **3+ hackathons** across Algeria, competing in high-pressure, multidisciplinary challenges and developing innovative technical solutions.
- Organized a Hogwarts-themed Ingeneer challenge involving 16 teams, combining cybersecurity with problem solving, design, AI, and networking.
- 3+ years of freelance development experience alongside university studies.

ADDITIONAL ACTIVITIES

- Mentor and technical team member within student technology communities; involved in hackathons, CTFs, networking activities, and practical cybersecurity learning.
- Interests: Full-Stack Engineering, Cybersecurity, AI, Competitive Programming, Open Source, and Technical Communities.
